6-9 May 2012

## Social and Economic Trends in East Asia: Impact on Social Protection Systems

**Mitchell Wiener**  
**Senior Social Protection Specialist**  
**World Bank Office in Jakarta**

Session Number: **WPS1**

**Joint IACA, IAAHS and PBSS Colloquium in Hong Kong**  
[www.actuaries.org/HongKong2012/](http://www.actuaries.org/HongKong2012/)

# Agenda

2

- World Bank's Role and Social Protection Practice
- Characteristics of Asia-Pacific region
- Major economic trends
- Major social trends
- Impact on social protection systems
- Country examples: Indonesia, Thailand, Timor-Leste

# World Bank's Role

3

- Work with client governments to improve development outcomes
- Bank assistance supports country's published development strategy
- Based on Country Partnership Strategy agreed to between Bank and government
- Combination of advisory and financing services

# World Bank Social Protection Practice

4

- Human Development Network: Social Protection & Labor, Health, Education
- Helps client countries assist individuals, households and communities to better manage the income and welfare risks that affect vulnerable groups
- Pensions, Safety Nets, Disability, Labor Markets

# World Bank EAP Region

5

American Samoa	Myanmar
Cambodia	Palau
China	Papua New Guinea
Fiji	Philippines
Indonesia	Samoa
Kiribati	Solomon Islands
Korea, Democratic Republic	Thailand
Lao PDR	Timor-Leste
Malaysia	Tonga
Marshall Islands	Tuvalu
Micronesia, Fed. States	Vanuatu
Mongolia	Vietnam

# Characteristics of Asia-Pacific Region

6

- Very small and very large countries
- Widely varying levels of economic development
- Differing religions and colonial histories
- Widely different political systems

# Macroeconomic Data: Developing East Asia

7

- Aggregate population: 2.0 billion USD (29% of world population)
- Aggregate GDP: 7.6 trillion USD (12% of world GDP)
- GDP per capita: 3,890 USD
- Percent urban: 46%

# Macroeconomic Data: Developing East Asia

8

	East Asia	World
Population	2.0 billion	6.8 billion
GDP (USD)	7.6 trillion	63.1 trillion
GDP per capita (USD)	3,890	9,135
Percent urban	45.9%	50.9%

# Major Economic and Trends: Developing East Asia

9

- Growing old before growing rich enough
- Rapidly growing real GDP fueled in part by demographic dividend
- Transition from lower to middle income status
- Growth of middle class, increasing disposable income
- Declining poverty, but high vulnerability
- High FDI and vulnerability to global crises
- Large migration flows
  - ▣ Exporters: Philippines, Indonesia
  - ▣ Importers: Hong Kong, Malaysia, Middle East

# Major Economic Trends: Developing East Asia

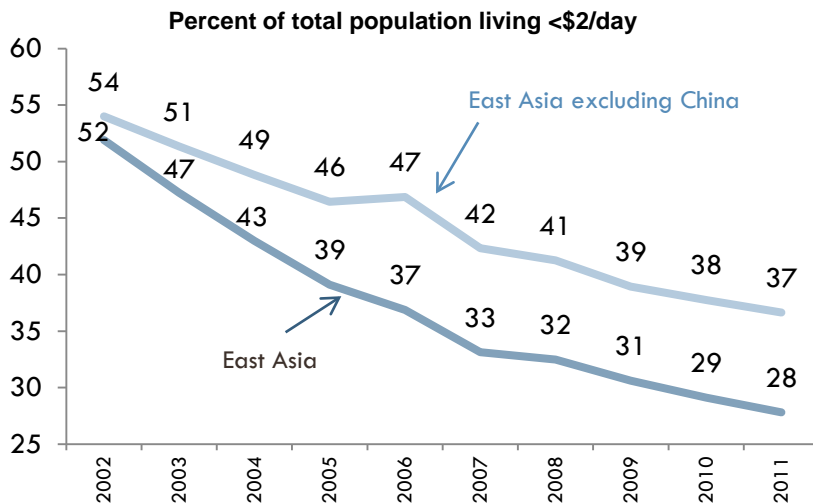

Highest economic growth

Lowest unemployment rate

Declining poverty

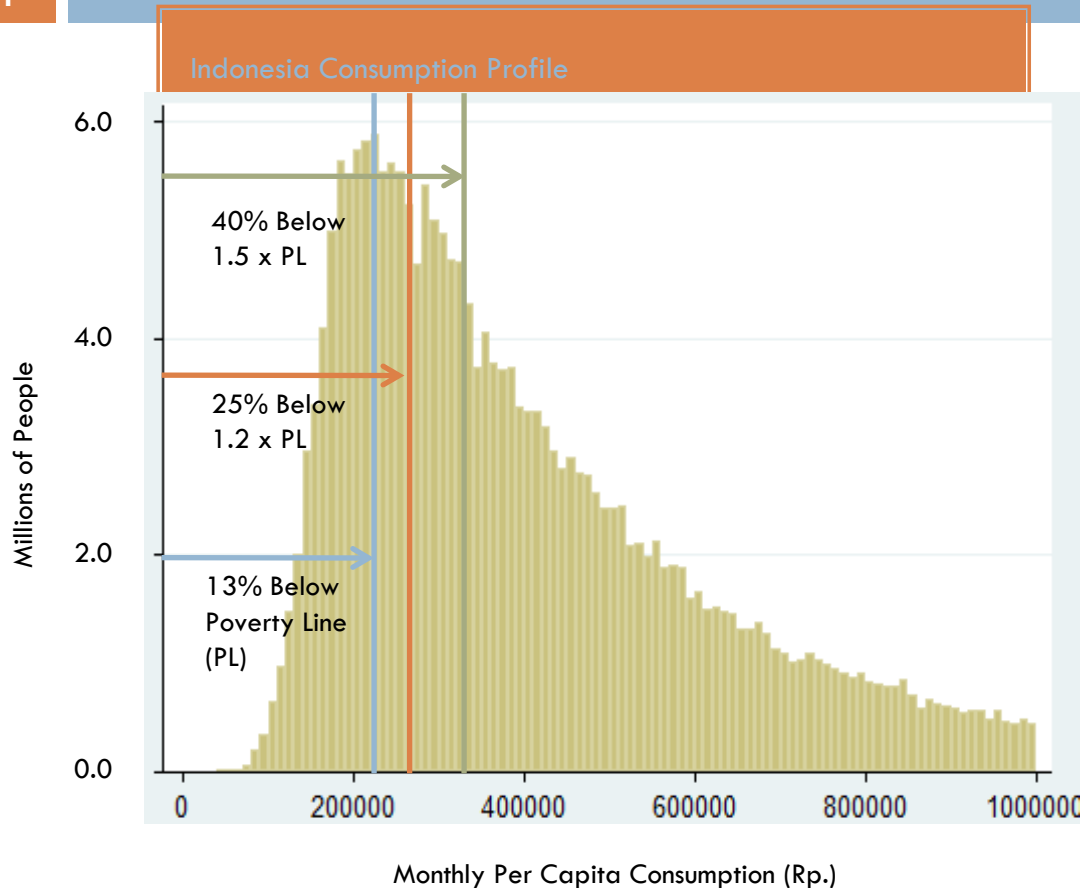

But rising inequality

# Major Economic Trends: Developing East Asia

11

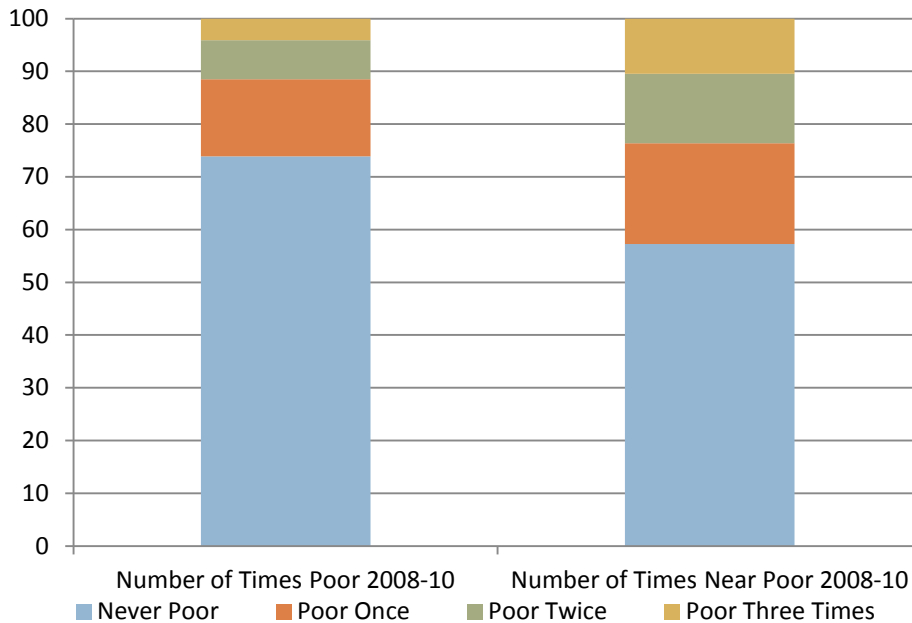

- 25% live below the official near-poor line (1.2 x poverty line)
- 40% live below 1.5 x poverty line (IDR 316,500/month)
- Despite solid growth and poverty reduction (23 to 13 percent, 1999-2010) an average Indonesian is still dangerously close to the poverty line

Source : Susenas (2010) and World Bank staff calculations.

# Major Economic Trends: Developing East Asia

12

Indonesia Poverty Dynamics

- In 2010, nearly half (48%) of the poor population was composed of those who were *not poor* in 2009
- This high level of churning, characterized by large movements in and out of poverty, is a persisting challenge

Source : Susenas (various years) and World Bank staff calculations.

# Major social trends

13

- Population aging
- Weakening of family support systems
- Increasing urbanization
- Decline in agriculture as % of GDP and labor force
- Large informal sectors, not shrinking
- Higher risk of social unrest: elderly poverty, youth unemployment, growing inequality

# Population Aging

14

- Caused by combination of declining fertility and increasing life expectancy
- Measurement of Aging Impact
  - ▣ Population composition by age group
  - ▣ Child dependency ratio
  - ▣ Old age dependency ratio
- Speed and timing of aging varies greatly by country

# Share of elderly in total population

15

### Labor Force and LFP Rate

### Dependency Ratios

# Timor-Leste

18

## Total Population

## Population Composition

## Labor Force and LFP Rate

## Dependency Ratios

# Comparison

19

	Thailand	Indonesia	Timor-Leste
Population peak	2030	2054	2080
Labor force peak	2023	2045	2080
LFP peak	2020	2034	2080
Minimum dependency ratio	2010	2020	2070

# Social Protection Issues

20

- Fragmented social protection systems
- Weak institutions can't perform core functions
  - ▣ Reliable contribution collection
  - ▣ Correct and timely benefit payment
  - ▣ Accurate data collection and recordkeeping
  - ▣ Financial management (including investments)
  - ▣ Proper governance structure
- Need for greater savings, but capital markets and prudential regulation underdeveloped
- Too much social assistance goes to those who are not poor

# Social Assistance Priorities

21

- Systems rather than individual programs
- Evidence based policy making
- Improved targeting systems
- Program monitoring and evaluation
- Preventing elderly poverty particularly for informal sector workers
- Youth unemployment

# Social Insurance Priorities

22

- Expanding coverage, especially to informal sector
- Improving health care access, delivery and quality
- Adjusting retirement ages for increasing life expectancy, maximize workforce productivity
- Assuring fiscal sustainability despite deteriorating demographics
- Improving institutional capacity
- Governance and protection of system assets

# Indonesia

23

- National social security system
  - ▣ Social insurance (5 programs)
  - ▣ Covers formal and informal
  - ▣ Uniform benefits
  - ▣ UHC first
- Civil service retirement program reform
  - ▣ More modern design
  - ▣ Supports change in structure and pay of civil service
  - ▣ DB vs. DC, whether and where to fund

# Indonesia

24

- BLT – permanent vehicle for dealing with rapid crisis response
- PKH – Pay poor families to keep their kids in school and get proper prenatal and child care
- PNPM – Community empowerment programs
- Reducing energy subsidies to free up fiscal space for social protection

# Thailand

25

- Debate on coverage of informal sector and reduction in elderly poverty
- Voluntary pension and insurance programs for informal sector
- Universal social pensions for informal sector
- Universal health care (3 programs)
- Fragmented pension programs
- Lack of coherent national pension policy

# Thai Retirement income programs

26

	Formal	Informal
Old-age pension (OAP)		
Government Pension Fund (GPF)		
Voluntary Provident Fund (PVD)		
Retirement Mutual Fund (RMF)		
Old-age Act, Social pension (OAA)		
National Savings Fund (NSF)		
Social Security Act, Article 40 (SSO)		

# Thai Social Pension

27

- Paid to all over age 60
- Universal program, not targeted
- Was 500 baht per month to all
- Since 2012, amount increases with age
  - ▣ 60-69      600 THB
  - ▣ 70-79      700
  - ▣ 80-89      800
  - ▣ 90+        1,000
- Eligibility levels and benefits not guaranteed by law
- USD\$1 = 31 baht

# Timor-Leste

28

- Fragile post-conflict country
- Rapidly growing population; high fertility
- Need to reward army veterans and freedom fighters
- Need to honorably retire older civil servants
- Need to intelligently manage oil revenue and petroleum fund
- SP without destroying work incentives

# Timor-Leste

29

- 2012: Budget financed pension program for civil servants
- 2013: Convert civil servant pension program to social insurance
- 2015: Extend pension program to entire formal sector

# Conclusion

30

- Rapid population aging will affect all countries in the region at different times
- Demographic dividend will soon end or has already ended
  - ▣ % children declining or already low
  - ▣ % at working age increasing slowly or already peaked
  - ▣ % elderly growing (amplified by low retirement ages)

# Conclusion

31

- Developing countries getting old before they are rich enough
  - Governance and administrative system are not yet mature enough for robust SP programs (“floppy disk in an abacus”)
  - Need for increased savings, but financial markets and regulatory systems are underdeveloped
- SP systems are a key component of sustained and equitable economic growth

# Role of Actuaries

32

- Help improve the quality and capacity of local actuarial profession
- Promote profession's expertise in risk management
- Educate politicians about need for actuaries and actuarial analysis for SP programs
- Participate in public policy debates
- Serve as a source of objective analysis. Support evidence-based policy making
