

Actuarial Education Survey

ICA 2014

The purpose of this survey is to get professional actuarial input regarding programs and courses that could be developed at the undergraduate or graduate level to better prepare students and promote actuarial science at the university-level. Thank you for your input.

1. What courses or other educational experiences would be most beneficial to students?
2. What topics are most important and should be stressed to students studying actuarial science?
3. What degrees, if any, would be most beneficial for an interested student?
4. For a student interested in pursuing a career in actuarial science, what are the most important accomplishments and activities for the student?

5. Where is the actuarial profession heading? How can we better prepare students for a possible transition?

6. How can actuarial science better be promoted in outreach campaigns and activities?
