  - Arranged in conjunction with the Institut Luxembourgeois des Actuaire
  - Scheduled for **May 19-21, 2027**
  - Stay tuned for future updates

# Working Party Update

- **[IFRS 17 Report — Actuarial Best Practices for Non-Life Insurance Companies](#)**

**A**STIN's Working Party on IFRS 17 Actuarial Best Practices has now accomplished its target objectives. The report with the results of the study is published in the IAA's website Access is restricted to ASTIN members. The ASTIN webinar will present the results of the study performed by this Working Party. With this working party, we hope to contribute to a better understanding of how the (re)insurance industry, from the perspective of actuaries working in non-life (re)insurance, applies the IFRS 17 Standard in practice and which should be best practices to consider. It will make this project worth it if the responses and conclusions in this report aid in validating current approaches and serve as basis for validation of future decisions. As a departing note, we would like to show our appreciation for all the respondents to this survey, for the underlying (re)insurance entities and particularly for the actuaries who have taken their time to provide us with the responses.

We also thank all the members of the Working Party for their efforts and personal time dispensed to prepare the survey, promote it worldwide and disclose this report

**Working Party lead Joana Raposo**
